

MULTI ROTARY SWITCH MULTI WHEEL

SPECIFICATIONS

MINIATURE ENCODER WITH 8+1 JOYSTICK FUNCTION FOR ONE-FINGER CONTROL, IP56 SEALED

- 12 detents Hall-effect sensed encoder with magnetic indexing
- Center button with 8 joystick directions and center push function
- 1 Mio encoder revolutions, 500k joystick actuations
- Full metal front-end; silver or black
- LED backlit illumination (RGB)
- 2.7 to 5.5 VDC supply, UART interface
- 400 µA stand-by current; ideal for battery powered applications
- 6 positions ZIF or soldering pads connection
- -20 to +60°C, IP56 sealed

POSSIBLE CUSTOMIZATIONS

- Front-end shape and color
- Connectors, cabling and pinning
- IPx7 or IPx8 sealing

TYPICAL APPLICATIONS

- Test & measurement for outdoor environments
- Cockpit (aviation, transport, construction, etc.)
- Industrial controls

MULTI WHEEL silver

MULTI WHEEL black

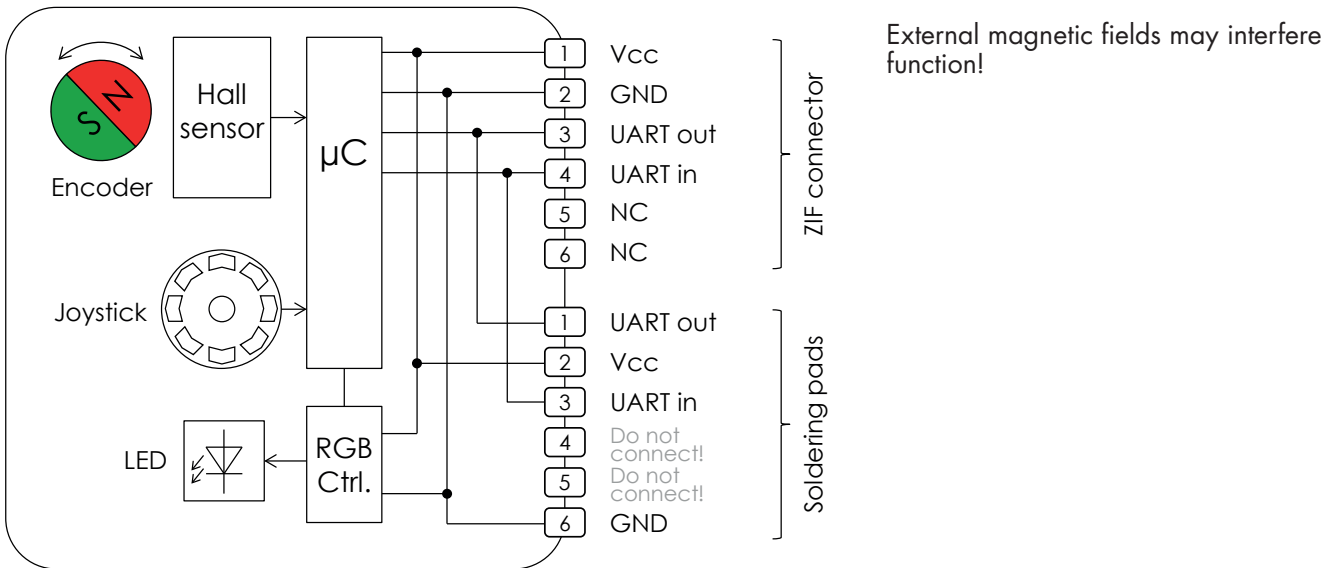

DRAWINGS

DIMENSIONS (mm)

At room temperature, +/- 0.1 mm tolerance.

CIRCUITRY AND PIN ALLOCATION

DESCRIPTION

Multi Wheel can be mounted from the front or rear using 2 self-tapping screws (included), driven into the plastic body. The outer O-ring provides proper front panel sealing. Connections are made via a 6 position ZIF connector or via available solder pads.

Supply voltage is 2.7 to 5.5 VDC and stand-by current is typically 400 µA (when not actuated and illumination is off). The two-way UART communication interface incorporates Multi Wheel output and a LED control input.

When operating Multi Wheel, each encoder step or joystick actuation generates an 8 bit command over the UART output interface (see communication spec). There is no communication in idle mode.

Activating the on-board solder jumper (see drawing), directs the device after re-powering into a demo mode where LED color changes by actuation (UART output keeps working in demo mode).

SPECIFICATIONS

MECHANICAL RATING

Indexing Resolution:	12 detents (magnetic indexing)
Switching torque:	0.5 Ncm (+/- 30%, over temperature range and life)
Directional push force:	1 N (+/- 30%, over temperature range and life)
Center push force:	3 N (+/- 30%, over temperature range and life)
Encoder life:	1 Mio revolutions (over temperature range, at 120 RPM max.)
Joystick life:	500k actuations (over temperature range, at 2 Hz max.)
Connector:	ZIF (6 positions, 0.5 mm pitch, top contacts) and soldering pads
Mounting screws:	M2 x 6 mm, self-tapping (DIN7500), with Torx head, included

ELECTRICAL RATING

Operating voltage (Vcc):	2.7 to 5.5 VDC (stabilized, 50 mV _{pp} max. ripple)
Current consumption:	400 µA typ. stand-by (3 VDC, room temperature, backlit illumination off, no actuation) 300 mA max. operation (3 VDC, room temperature, backlit illumination at full brightness, white color, actuated)
UART interface:	9.6k baud, 1 byte non-inverted, even parity, 1 stop bit. UART output remains silent when not actuated. (When sending commands to UART input please maintain a 30 ms minimum interval time).

MATERIALS AND FINISHES

Front-end:	Zinc die-cast, matt chrome plated (silver version) or ED painted (black version)
Housing:	Polycarbonate, transparent, UV resistant
Sealings:	Outer seal (O-ring); ø1.5 mm, NBR70. Inner seal (gasket); EPDM closed cell foam rubber

ENVIRONMENTAL RATING

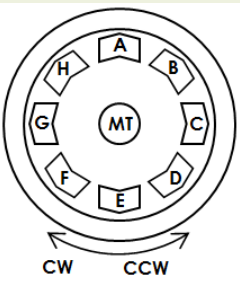

Temperature ranges:	-20 to +60°C max. operating and storage
Humidity:	90% relative humidity max., non-condensing (against front panel, MIL-STD-202G, method 103B, condition B)
IP sealing:	IP56
Dielectric strength:	1,000 VDC during 60 sec. (MIL-STD-202G, method 301)

PACKAGING

Packaging:	Single piece packed (antistatic bag)
------------	--------------------------------------

COMMUNICATION

UART OUTPUT:

ACTION		COMMAND
	Joystick	A
		B
		C
		D
		E
		F
		G
		H
		CP (center push)
		Return to steady state
Encoder	One step CCW	
	One step CW	

A command is sent at every changing encoder or joystick situation.

UART INPUT (LED CONTROL):

FUNCTION	COMMAND	EXPLANATION
RGB Color	0dec bis 90dec	- 0 (default) to 89 (see RGB spectrum below) - 90 is white
Brightness	100dec bis 103dec	100 is off (default), 101 is lowest, 103 is highest brightness
Sign of life request	255 dec	Causes a 255dec UART output as a sign of life

RGB SPECTRUM:

ORDERING CODE

FUNCTION

1 Standard; 12 detents, 8+1 joystick

ILLUMINATION

RGB RGB

FRONT-END; SHAPE AND COLOR

SLV Standard shape, silver
BLK Standard shape, black
